january 2008

each child community child & family centre child care & kindergarten

each child is special, every family is unique

we believe that family is the most important and influential factor in a child's development and that all families need support with the challenges of raising children.

each child will work in partnership with parents to support the development of positive family and community relationships.

each child offers a unique opportunity for children and their families to participate in a child care and preschool centre that is part of a range of community health and support services for children and their families.

giving children a good foundation

We believe that children build resilience by exploring their world and experiencing success and challenge.

Our programs will provide children with opportunities to explore and question their environments.

We believe that the quality of care is directly influenced by the professionalism and commitment of staff at all levels. Therefore we employ, professional, caring staff, who are responsive to the needs of the children.

healthy bodies healthy minds

Our programs will challenge children to think about how we care for our bodies, by exposing children to knowledge about good nutrition and healthy eating.

Staff will discuss healthy food choices and will actively model positive eating practices.

Children will be involved in the process of planting, nurturing, harvesting, preparing and eating fresh foods.

All food will be prepared on the premises, from fresh ingredients wherever possible. Menus will be planned to meet the children's dietary requirements.

service information
