

homelessness and mental health research

examining services for young people

Do you:

- Work for a mental health or a homelessness service?
- Then we would love to hear from you!

A new research project, conducted by each and Eastern Health, aims to identify:

- Current service practices for young people experiencing both unstable housing and mental health difficulties
- What factors increase the risk of homelessness or not engaging with services for young people
- How services could best work together to minimise these risks for young people

The researcher, Dr Emma Black, would love to meet with you to hear about your work experiences. In appreciation of your valuable time, a \$10 donation will be made to a charity of your choice.
